About me

Transitioning Professional seeking for
Designing
Opportunities.

Aspiring Entry Level Professional with a strong interest in Web Tech. Skilled in HTML, CSS, Bootstrap and UI/UX Design. Known for a collaborative approach and a commitment to continuous learning and applying new technologies.

Work experience

Wipro Technologies, Chennai — Project Engineer

April 2022 - May 2023

- Collaborated with cross-functional teams to identify training needs.
- Successfully managed and tracked employee compliance records.
- Led the onboarding and off boarding processes for new employees of a specific client, ensuring a seamless transition and positive employee experience using SAP Successfactors.
- Developed and maintained onboarding/off boarding documentation, checklists, and standard operating procedures.
- Collaborated with other departments to coordinate the provision of resources and access for new employees.

Reason for Career Change

Due to my interest towards Web Development I have created my own projects but I would like to take part in a professional way. Even though I do not have any work experience in this field, I would like to try it inorder to achieve my dream. I think this is the right time for me to pursue my dream job and work hard for it. This is the reason for looking for a new job.

My Initiatives

I have taken a Career break from
May 2023 – Dec 2023

- During this career break, I focused on my mental wellbeing and took online courses to hone my skills.
- Proactively pursued online courses in Web Technologies and Programming Languages through platforms like Coursera, Udemy, SoloLearn, etc.
- Demonstrated self-motivation and commitment to continuous learning, acquiring valuable skills in Bootstrap, JavaScript, TypeScript, Angular and PHP.

Portfolio

Done this design as a part of UX Design Fundamentals Course

GuardianTrack is a comprehensive missing persons search and rescue app designed to leverage various means of searching, including collaboration with law enforcement, military, adoption agencies, and community organizations. The app addresses the critical issue of missing children and adults by providing a unified platform for efficient and coordinated search efforts. GuardianTrack aims to bring families back together, providing a ray of hope in times of distress.
